## RAIN HELPS FAIRVIEW RESERVOIR

**Held Its Own For Over Five Hours as Shown by Measurements—Only Small Drop at Mohegan Lake—Water Boat From New London.**

It rained on Friday, for a large part of the day, and while it is probable that there was not a half inch which fell, it did the springs and brooks good and the benefit of it was felt at Fairview reservoir and at Mohegan lake, two spots in the limits of the town which are of particular interest at the present time. As it was not thought the storm was over, no measurement of the water fall was taken on Friday. Friday morning Supt. Corkery of the water department took readings of the large meter at Fairview at 10:20 o'clock. At 3:20, just five hours after, the meter was read again, showing that 253,000 gallons of water had been drawn from the reservoir. When first read, the water in the reservoir was down 336 inches, and at the second reading it had not dropped, showing that the water flowing in had balanced the consumption during that time, and it no doubt continued through the day. There was an eight inch stream flowing in from Meadow brook.

At Mohegan lake the benefit of the rain was also felt. It is impossible to tell the amount of water drawn from there, but when measured the water had dropped half inch since Thursday, being down 41-2 inches from the level when the water from that Friday was turned on.

On Friday President Ray of the Artesian Well and Supply company was won nineteenth place in Thanksgiving Marathon Race at Yonkers.

**WICKS WON SILVER MEDAL.**  
Won Nineteenth Place in Thanksgiving Marathon Race at Yonkers.

W. H. Wicks of this city, who finished nineteenth in the Yonkers Marathon Race on Thursday, reached here Friday and had with him a beautiful silver medal such as were presented to the twenty-five competitors in the race who finished after the first eight. The first eight were awarded silver loving cups, the size and cost of them varying with the position of the winners at the finish.

There were sixty entries, including runners from all over the country, and three Connecticut men were among the number. C. Collins of West Haven, who finished tenth, W. H. Wicks of this city, who finished nineteenth, and F. T. Hendon of Hartford, who finished thirtieth.

**YALE PINNING HOPES**  
ON H. S. PALMER  
Intercollegiate Swimming Championship Now Attracting Attention.

"Tank artists" doesn't always mean in the colleges the ladies and "gentle" who act on the stage in the real "water" drama. Just now it means the agile athletes who uphold the honor of their alma maters, or alma matres (which is correct, professor?) in the swimming contests. The attention of the swimmers is now fixed on the coming intercollegiate indoor swimming championships. Yale expects every swimmer to swim his best, course, but it is pinning a large share of its hopes on H. S. Palmer, who holds the 220 yard championship. All of the colleges regard the water polo teams in this shape, with not a man afraid to get into the water and enter the gruelling contests, probably the most severe known in rah-rah athletics. This winter's season is expected to be one of the liveliest in the recent history of the sport.

**LOGICAL REMEDY FOR ECZEMA**

Many different remedies have been tried for Eczema and other skin diseases. But it is now known that the only possible cure is a mild, soothing liquid made up of Oil of Wintergreen, Thymol, Glycerine, and other ingredients so carefully compounded that each ingredient has its proper effect. This compound is now made up in the D. D. D. Prescription. Ten years of success and thousands of cures show the merit of this wonderful compound, but the most convincing proof is a trial of the remedy by any eczema sufferer.

D. D. D. will prove to you that you can be cured. The very first drops will give you instant relief. Get a trial bottle today.

H. E. Smith, 205 Main Street.

## CAPT. JOHN WARD FED THE HELP HIGH

Turkey Three Times a Day and They Kicked.

It would be hard to find in these days of high prices, except at the Thanksgiving and Christmas season, says the New London Day, an adult or minor who has had so much turkey meat that he or she will say, "I never want any more turkey." At the time of the building of the New London Northern railroad men were to be found who had had enough turkey to make them sick. One New London man, who knew of the incident, tells the story every Thanksgiving day, at least, to his grandchildren to show them that a person may become tired of turkey as well as anything else.

Capt. John Ward, who had a farm at Thessville, took a gang of workmen on the Northern road contract to board, when the bridges were being built in that section. He was the father of the late Capt. William Ward, well known by New Londoners of middle age. Captain John had more turkeys on his farm than he could sell. He had raised a big flock and the prices were so low, owing to the birds being especially numerous that year, that he served turkey to his boarders in lieu of beef, which was a great deal more expensive.

One day William Williams, foreman of the gang which boarded at Captain John Ward's, went to Contractor John Breed to register a kick about the table at the boarding house. The contractor heard Bill Williams' kick, which went something like this: "We get nothing but turkey up here. When we started in there four weeks ago we had turkey and thought it was a rare treat. About the second week we began to change our minds. Now we get turkey for breakfast, turkey for dinner, turkey for supper and what's left is warmed up for breakfast. Then we have fresh turkey and what's left is that's the way it goes. The men are sick of turkey."

"Contractor Breed is reported to have looked sharply at Williams. 'Well, d— it!' he said, 'you don't know when you're well off. They set a better table down at your boarding house than I have at my house!'"

The spokesman went back to the gang and reported that there was no relief to be expected from the boss. It is not recorded that the menu at Captain Ward's changed before the turkey flock was eliminated.

**VISITED SANITARIUM.**  
Governor-elect Baldwin Inspects Shelton Institution.

Governor-elect Simon E. Baldwin visited the state tuberculosis sanitarium in Shelton Tuesday afternoon in company with Dr. George Knight, the chairman of the state commission, and Commissioner Hall, and inspected in a very thorough manner the entire institution. The newly elected governor showed a keen interest in all the details of the plant, and while expressing no opinion publicly about the institution itself, was outspoken regarding the beauties of the location, and especially the magnificent view from the top of the hill.

His few inquiries were pertinent and showed that he was in sympathy and accord with the purposes of the institution, and he will be in a position to thoroughly understand any legislation that may be offered during the coming session of the general assembly pertaining to the needs of the institution.

**An Owl's Appetite.**  
A screech owl will eat a quantity of food equal to a ten pound leg of mutton, according to a statement advanced by Athena R. Sherman of Worcester, Ia., made at the 28th annual convention of the American Ornithologists' union, which was in session last week at the National Museum at Washington, D. C.

**MUCH IN LITTLE.**  
Sixty-four out of every one million persons the world over are blind.

There are eleven periodic comets of which the return of each is observed. To date more than 800 practical aeroplanes have been built in France. Nearly 500,000 tons of paper are annually manufactured in the United Kingdom.

Since 1902 there have been 45 deaths due to balloons, steerable and non-steerable.

Alcoholic liquors for the use of natives are not permitted to be imported into Somaliland.

Starch will remove iodine stains from flesh, and if used soon enough will prevent the liquid blistering.

In a flouring mill the exact measurements get only four cents a day, which is gradually increased to 22 cents.

New rope may be made pliable without impairing its strength by boiling it for an hour or two in water.

Within the last ten years the Methodist church in the Philippines has grown to a membership of 30,000, and 500 Filipinos are preaching.

Plans have been completed for the establishment of great preserves in Africa where the elephant may be free from the attacks of the hunters. In some parts of the Dark Continent the elephant has been exterminated.

The excess of exports of merchandise over imports in the United States for the first nine months of 1910 amounted in value to \$55,535,298. However, in the same period last year the excess was \$29,425,554, and in the 1908 period \$42,269,181.

The two avowedly North American enterprises in Argentina are the La Plata Cold Storage company and the La Blanca company. The former since coming under its present control, has risen from a state of insignificance to that of the largest single producer in the Argentine field.

It is understood that splendidly equipped passenger through trains are soon to run from Mexico City to New Orleans via Monterey, Matamoros and Brownsville. It is believed this connection will soon prove an attractive and valuable freight route between certain parts of the United States and certain parts of Mexico.

Consul Augustus E. Ingram writes that the City of Bradford Co-operative society has just celebrated its fiftieth anniversary. The society began in 1860 with a capital of \$1,421; today its capital amounts to \$2,078,000. Its trade has grown from \$3,630 in 1860 to \$2,530,580; and the profits have increased from \$160 to \$269,854, which were distributed to its members in dividends.

**ELECTRIC SYSTEM**  
Promised for New Haven Road—Big Plans Outlined.

Wednesday's New Haven Times-Leader says: Some idea as to what the New York, New Haven and Hartford railroad intends to do in the way of improvement of its system and enlargement of its business may be gleaned from the statement of Vice President Byrnes made today in Boston in which he says:

"Within ten years I believe you will see through trains running from New York, the south and west to Maine, New Hampshire and the provinces. We will be running electric trains between this city (Boston) and New York. Neither our railroad nor any other railroad is in business for philanthropy. We want to make money. We don't make money looking ahead into the future and growing. When I came here six years ago the New Haven was earning \$40,000,000 annually. The past year the road earned more than \$60,000,000.

In the past seven years we have spent more for locomotives, cars, bridges and equipment than the railroad was capitalized for in 1903."

**How Much, Please?**  
Mr. Robert A. McCarthy wants \$75,000 for obstructing the passage of the Michigan Central tunnel through the Backus property. And what would he have charged to build it—Detroit News.

Alaska has 4,000 miles of waterways navigable for steam vessels.

## Preston Bros. Five Gallon Water Bottles

are considered about the best vehicle to get your spring water in. They are comparatively light and low in price, also any impurities in the water can be readily detected.
